

BUSINESS ANALYST

360 Dotnet is looking for a Business Analyst to join our Leicester office to help take our end to end practice management system, 360 Lifecycle even further ahead of its competitors.

Working as part of our Product Management Team you will work alongside our Product Manager, team of BA's and UI/UX Designers to deliver our vision by following our product roadmap. This delivers the expectations of our internal and external stakeholders. You will join your own development team with Software Engineers and Testers and collaborate closely to deliver your knowledge to our SaaS cloud platform. We predominantly use Microsoft based technologies and have been an early advocate of Microsoft Azure.

ABOUT US

360 Dotnet launched its award-winning product, 360 Lifecycle into the financial market in 2012 and provides an end to end practice management system, that supports IFAs, mortgage and insurance brokers, to grow their business.

The company has grown to become a major player in the mortgage intermediary software market; 20% of mortgage brokers rely on its software, and its clients include leading names in UK financial advice, such as Knight Frank Finance, Alexander Hall and Quilter.

RESPONSIBILITIES & DUTIES

- Work as part of our Product Management Team alongside our Product Manager, team of BA's and UI/UX Designers to deliver our vision by following our product roadmap.
- Prioritise our product backlog to ensure the highest value features are delivered first.
- The ability to take an idea and break it down from an Epic to a Feature and further into User Stories that can be fed into the development team for delivery.
- Experience using Business Analysis techniques to create engaging specifications and documentation that is fit for 360 Lifecycle.
- A clear understanding of the different stages within software development and how the Business Analysis function fits into an agile delivery methodology.
- Experience of working collaboratively with Designers, Developers and Testers to produce cost effective solutions within the boundaries set by technology and resources.
- Experience of working with user groups to gain an understanding of how they use the products through workshops and experimentation.
- The drive and ability to succeed in a complex, exciting team environment is a must.
