FULL STACK DEVELOPER

360 Dotnet is looking for a Full Stack Developer to take our client relationship management system, 360 Lifecycle, even further ahead of its competitors.

We are actively developing new products and upgrading our existing applications, using some of the latest web and cloud technologies. We predominantly use Microsoft based technologies and have been an early advocate of Microsoft Azure. You will be required to have an advanced understanding of software development principles and experience in working at all levels of the MS stack, the ideal candidate will have deep familiarity and experience with:

- C#
- .NET Framework/Core
- Azure
- SQL
- JS, CSS, and HTML fundamentals
- At least one of the front-end framework/library like Angular, React and Vue.js

ABOUT US

360 Dotnet created the software, 360 Lifecycle, for mortgage and insurance advisers. Whether it is arranging a mortgage or protecting clients against the unknown; we help businesses and clients succeed. We enable businesses to make a positive social impact, helping families to buy their homes and plan their financial future. Our customers choose us for our proven technology solutions, our expertise and our exceptional service.

Our software is trusted by some of the UK's best regarded financial advice brands. We have grown to become a major player in the mortgage intermediary software market; 20% of mortgage brokers rely on our software, our clients include leading names in UK financial advice, such as Alexander Hall and Quilter.

RESPONSIBILITIES & DUTIES

- Work as part of an agile development team alongside a Product Owner, Testers and Platform Engineers.
- Deliver assigned features on time
- Turn a comprehensive set of requirements into quality software solutions using the most appropriate technologies.
- Contribute towards solution design and architecture to ensure the platform remains cost effective and scalable.
- Work with the test team to ensure a high level of quality and quick turnaround of bugs and issues.
- Support and maintain existing software applications and identify opportunities to improve and update existing architecture.

SKILLS & EXPERIENCE

- A passion for technology and creating rich applications which solve complex problems.
- An understanding of full stack development, service-oriented architecture, and cloud technologies.
- Experience of working within each stage of the Software Development Lifecycle.
- A sound understanding of industry best working practises and SOLID development principles.
- Experience of working to well defined Product Backlog and user stories with an emphasis on test driven development.

BENEFITS

- Hybrid working between home and our Istanbul office
- Visa/ sponsorship opportunities leading to work in the UK
- Opportunity to work in the UK
- Lunch allowance
- Health Insurance
- Be part of an award-winning and expanding business with over 6,000 users of our CRM within the financial advice industry
